Referral to Payment Process

Pacific Hyperbarics - one simple loop from first referral to the thank-you report.

1 Encourage | 2 Receive | 3 Authorize | 4 Schedule | 5 Treat | 6 Bill | 7 Report back

Stage	Owner	Done when
Encourage	Mike / marketing	Each referring office has our referral sheet and fax, and hears from us regularly
Receive	Front desk	Referral, notes and insurance logged; patient called the same day
Authorize	TMS billing	Written authorization from the insurer is in hand
Schedule	Front desk	Sessions booked inside the authorized dates
Treat	Clinic staff	Session note signed the same day
Bill	TMS billing	Claim accepted; any reject fixed and resubmitted quickly
Report back	Clinic physician	Progress note sent to the referring doctor during care and at discharge

The rule

Every patient is on one list with one status: Received, Auth pending, Authorized, Scheduled, In treatment, Done, Closed.

Tracking

One list - staff update status, billing adds proof.
Morning check - anything stuck goes to Mike.
Weekly close - sessions done vs billed vs paid, gaps sent to billing.

Report to the referring physician

One page: patient, diagnosis, progress since start, next step, our phone and fax. Add a thank-you line and a blank referral form. This report is also the best way to earn the next referral.
